WHERE **WOODS CONVERGE**

Arca evolves as a curated wood mix system, now refined with a more sophisticated color story, a bold new wall texture, and expanded decorative options, 100% made in the USA. It is designed for today's interiors where wood is not a single species imitation, but a composed material choice, warmer, calmer, and more architectural.

Arca Tropical 08x48 NAT RECT

Arca has never been about one wood species. It is a designed fusion of natural references, a careful edit of real woods brought together to feel authentic, warm, and collected. Multiple species and tonal cues create a surface with depth and variation that reads curated, not copied.

Arca Alpine Convesso 24x48 NAT RECT
Arca Alpine 08x48 NAT RECT

This evolution introduces a new color interpretation, Alpine, that softens the palette, a warm maple inspired base with a subtle blush undertone, finished with a controlled white wash infusion that brightens the background and lets rustic detail show through with restraint. The result feels sun worn and lived in, yet clean enough for contemporary spaces

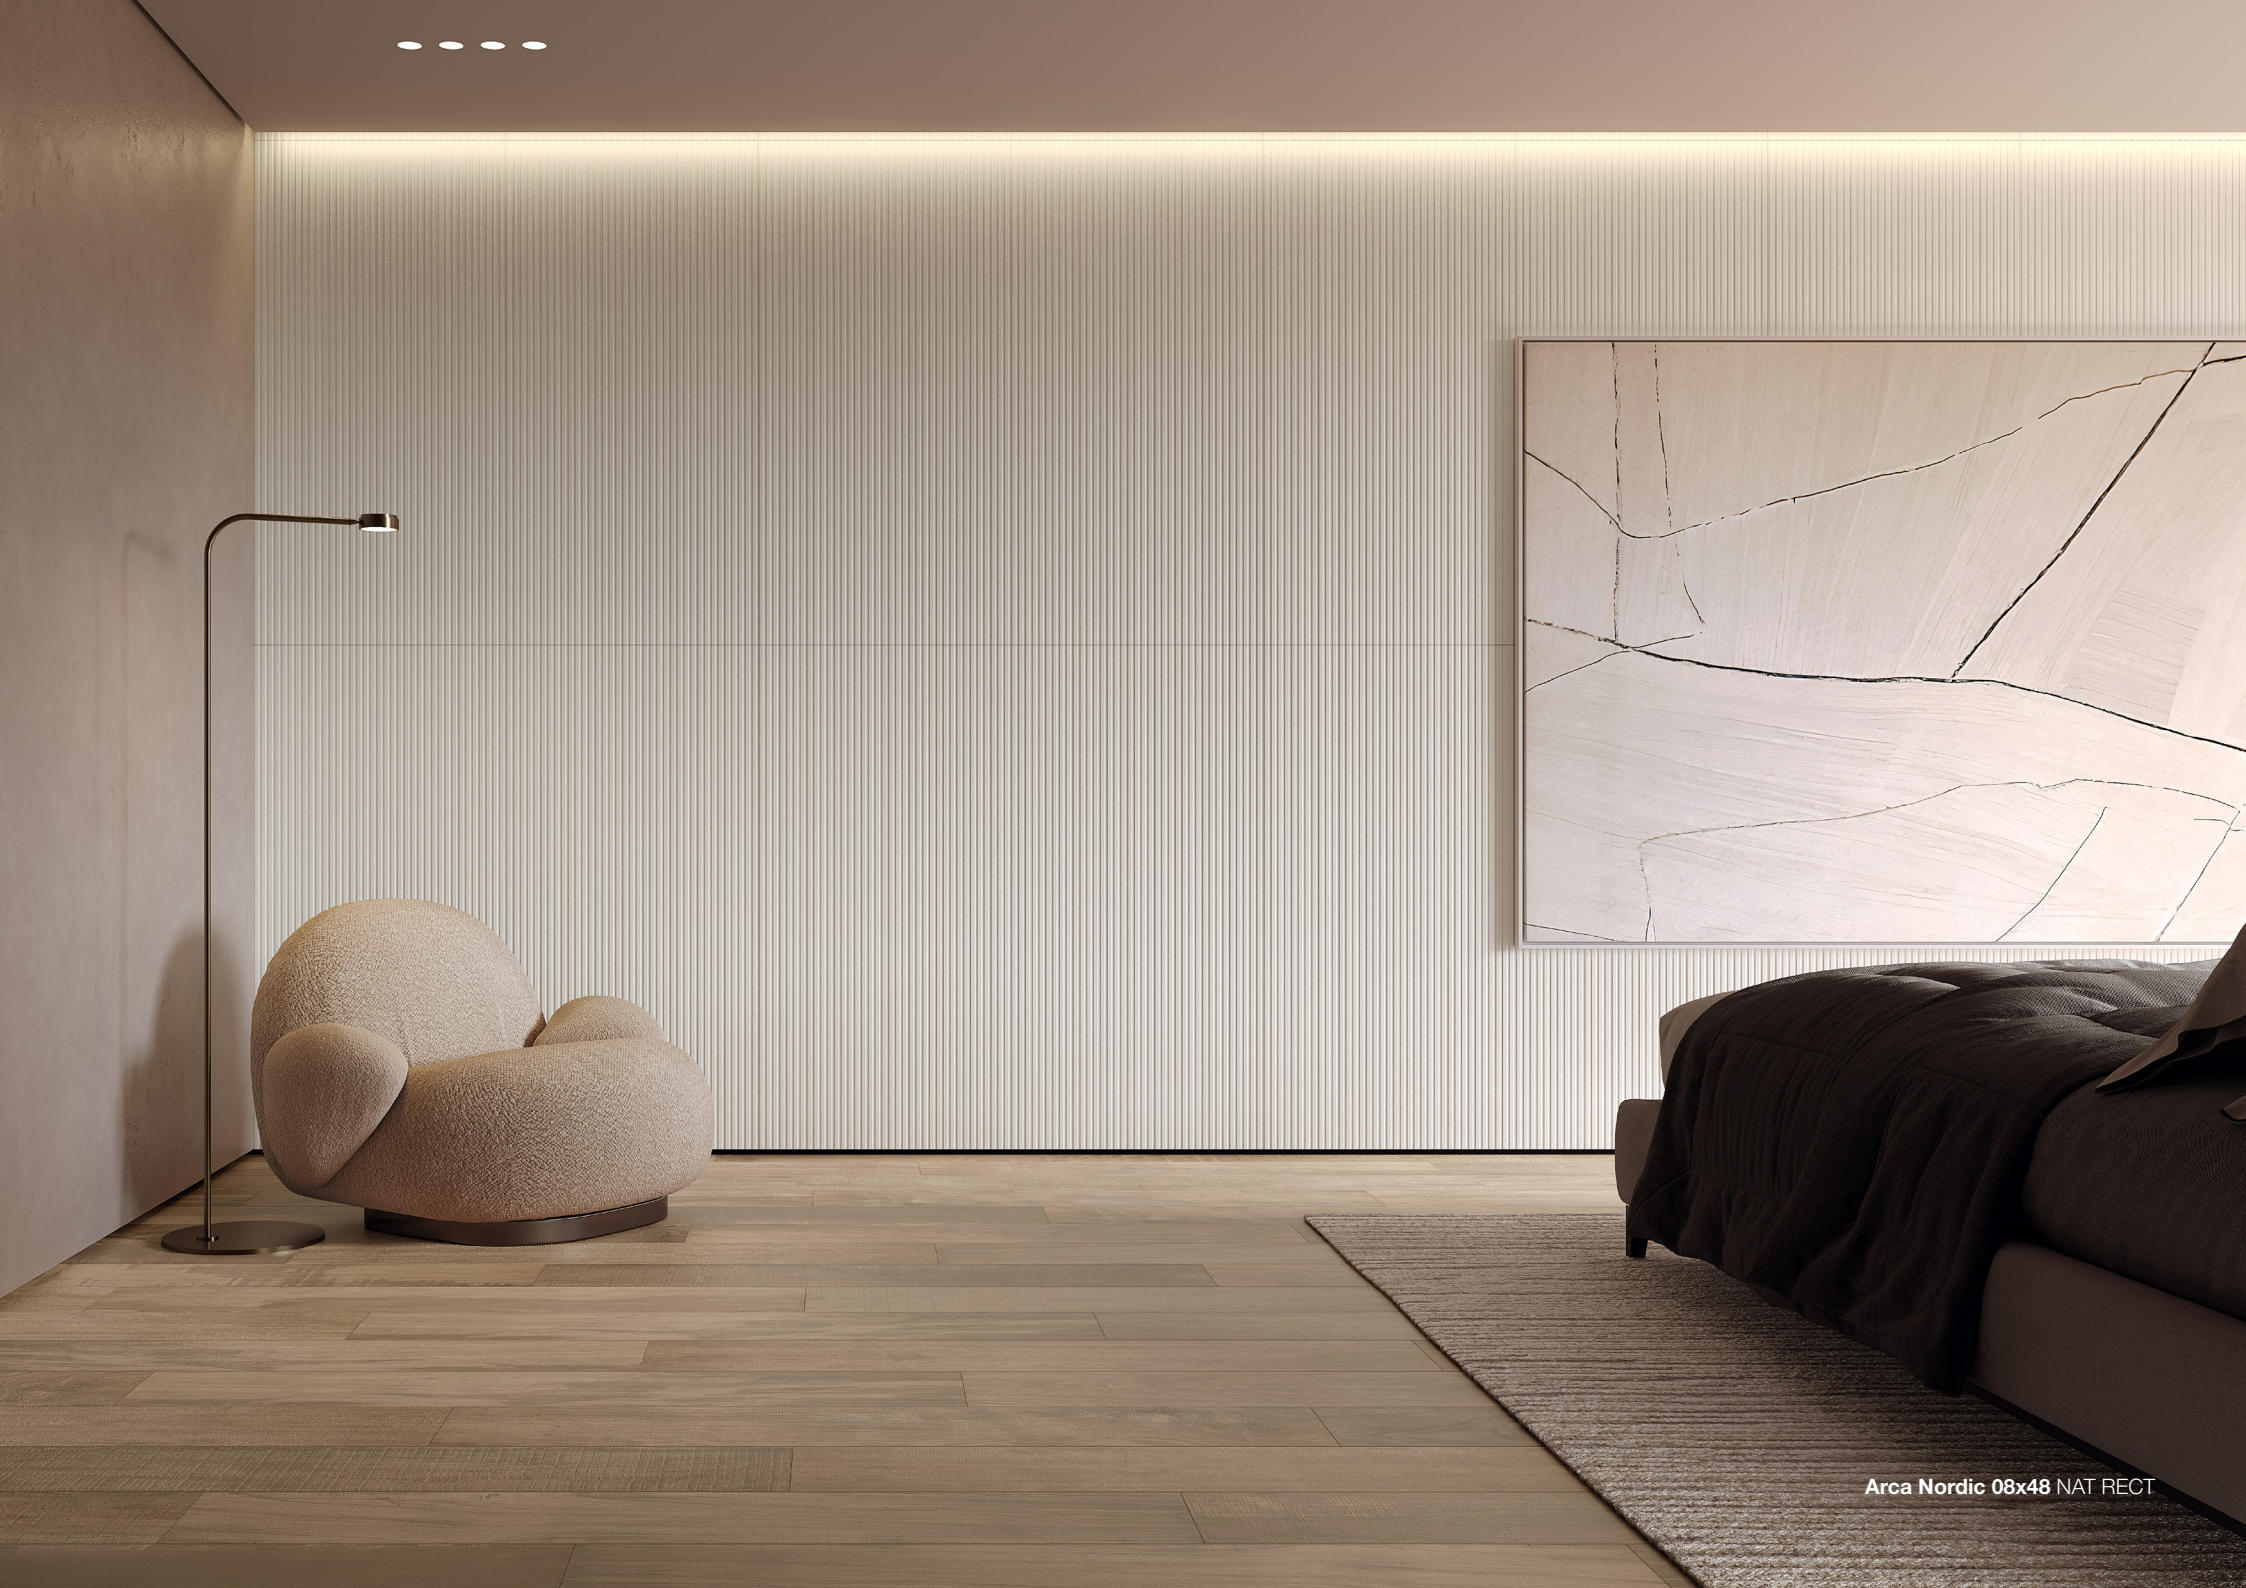

Arca Tropical 08x48 NAT RECT

Arca also expands its wall design system with a new 24x48 Convesso relief, a bold, sculptural format inspired by current kitchen wood trends and carved cabinet details. Think cut wood slats and wood strip rhythm translated into porcelain. Technically, the relief was engineered for greater unity across the printed faces, so the texture reads intentional and composed, not aggressively rustic. It's designed for walls that need dimension, with a quiet architectural cadence.

PROUDLY MADE IN USA

Portobello America brings design, innovation, and advanced manufacturing technology to the North American market through a brand shaped for the way this industry designs, specifies, and builds.

Guided by global research and local insight, we transform architectural vision, aesthetic expectations, and technical demands into surfaces that raise the standard for performance, precision, and responsiveness.

Manufactured in the U.S. and backed by Green Squared certification, our products give distributor partners and design professionals the confidence to move from concept to jobsite with greater speed, consistency, and assurance.
