CARRARA
ICON

THE LASTING
EXPRESSION OF **NATURE**

The enduring natural beauty of Carrara defined by mineral depth, organic veining, and unmistakable elegance. Carrara Icon captures that essence and translates it into porcelain with purpose: to preserve what makes the original stone iconic, while refining it through design intelligence and advanced surface engineering.

Carrara Icon 48x106 NAT RECT

his is where control becomes part of the beauty: the ability to capture Carrara's movement precisely and faithfully, keeping it consistent across formats, finishes, and applications. **Depth** is the result: **a layered, mineral reading built through multiple strata of veining, not a single flat print.**

While many contemporary Carrara looks simplify the marble into a bright white background with a few bold lines, Carrara Icon is built around realism. It preserves the full natural hierarchy of the stone, including sub veining and softer mineral shifts, **creating a white that feels architectural and alive, never sterile.**

Carrara Icon is conceived as a coordinated porcelain global collection for commercial and residential specification across markets, with products made in USA exclusive to north American market.

Soft is the collection's key USA factory innovation: **a satin, silky touch finish with controlled sheen that reframes polished into a more versatile, contemporary experience**, reducing glare while preserving usability, a polished with the light turned down.

PROUDLY MADE IN USA

Portobello America brings design, innovation, and advanced manufacturing technology to the North American market through a brand shaped for the way this industry designs, specifies, and builds.

Guided by global research and local insight, we transform architectural vision, aesthetic expectations, and technical demands into surfaces that raise the standard for performance, precision, and responsiveness.

Manufactured in the U.S. and backed by Green Squared certification, our products give distributor partners and design professionals the confidence to move from concept to jobsite with greater speed, consistency, and assurance.
