TACTILE SIDE **OF COLOR**

Loom turns color into a tactile design language. Inspired by handmade textile processes and the rustic beauty of sisal, the collection reinterprets woven materiality through a contemporary, architectural lens. Its palette moves from refined neutrals to greens, merlot, and deep brown, opening space for bolder, more distinctive compositions across the portfolio.

Loom Collection

What defines Loom is the precision behind its surface. Through ceramic innovation, the collection combines a matte finish with a controlled grit effect to recreate the soft, rustic tactility of textile fibers, giving color a more physical, sensorial presence. This balance of artisanal inspiration and technical intention allows the surface to feel warm, expressive, and highly resolved

Loom Camel 06x06 MATTE PRESSED

Loom Merlot 06x06 MATTE PRESSED

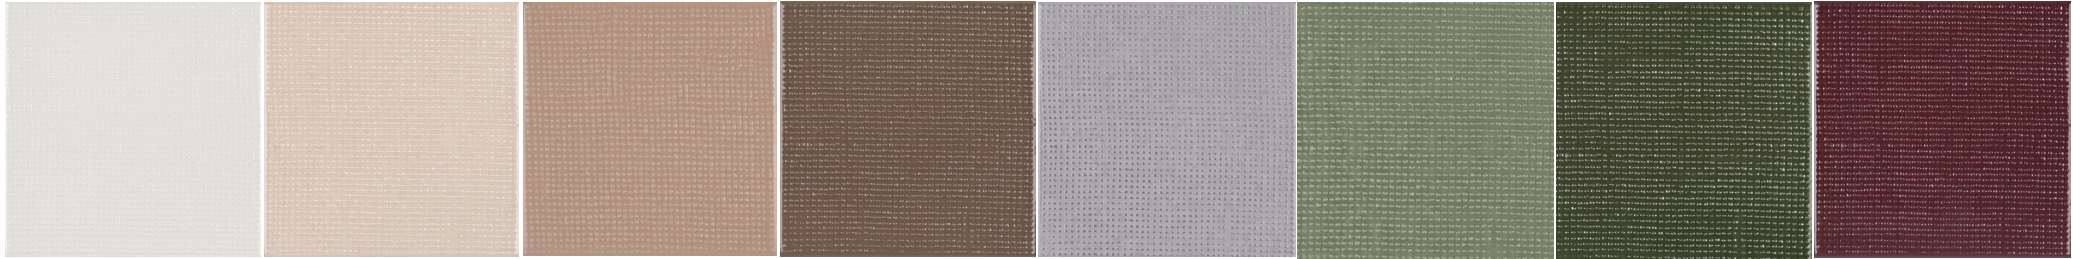

Developed in 6x6 and 2x10 formats, Loom unfolds through two complementary expressions: Relief, which brings the tactile woven effect into focus, and Warp, a quieter plain option designed to give compositions space to breathe. Together, they create a flexible system for mix-and-match applications, where color, texture, and rhythm come together with boldness and refinement.

PROUDLY MADE IN USA

Portobello America brings design, innovation, and advanced manufacturing technology to the North American market through a brand shaped for the way this industry designs, specifies, and builds.

Guided by global research and local insight, we transform architectural vision, aesthetic expectations, and technical demands into surfaces that raise the standard for performance, precision, and responsiveness.

Manufactured in the U.S. and backed by Green Squared certification, our products give distributor partners and design professionals the confidence to move from concept to jobsite with greater speed, consistency, and assurance.
